

We Can Thrive While Creating a Sustainable World Beginning Today

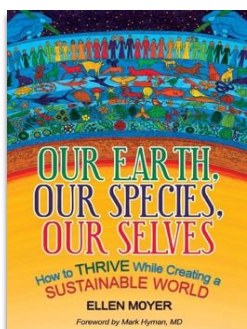

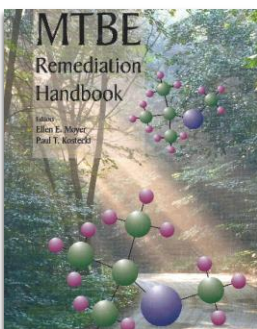

Ellen Moyer, PhD, PE, LEED

Ellen Moyer, PhD, PE, LEED believes we can repair the environmental crisis we're in and create a sustainable way of life — *in an enjoyable way*. She is an environmental consultant, author, and speaker with a BA in anthropology, an MS in environmental engineering, and a PhD in civil engineering.

Dr. Moyer is a **registered professional engineer** as well as a US Green Building Council Leadership in Energy and Environmental Design Accredited Professional. Her work focuses on sustainability, resource protection, economics, pollution prevention, and environmental cleanup.

Readers are loving her third book, ***Our Earth, Our Species, Our Selves: How to Thrive While Creating a Sustainable World***, released in December 2016. Dr. Moyer is a regular contributor to ***The Huffington Post***.

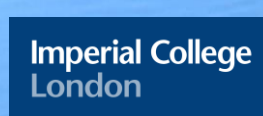

Dr. Ellen Moyer reveals that right now is the most exciting, most dangerous, and most important time to be alive in all of human history. Our current crises call on us to **upgrade to a new way of life** that will sustain us and our world far into the future. We already have the capacities and tools we need.

Specific practical, effective, and enjoyable actions you and I take now will help us and our world prosper, not just in the future but immediately. Creating a high-tech and high-nature way of life could **save money and spark an economic boom**. We can succeed, and thrive in the process.

Dr. Moyer's extensive speaking includes:

- 100 seminars in North America and Europe for industry representatives, regulators, educators, remediation technology vendors, lawyers, and environmental consultants
- 60 presentations on biological water treatment technology
- A three-day course for the US Army Corps of Engineers
- Platform presentations and moderating at conferences
- Testimony at public hearings and the Massachusetts State House

"Dr. Moyer brings a rare combination of evolutionary perspective, knowledge, experience, insights, and ability to effectively articulate the interdependent challenges we face. She has inspired us with an empowering and practical approach for how individuals, organizations, and societies can thrive while helping to create a more sustainable world. I highly recommend her!" — *Ajay Kathuria, PE, Manager, Louis Berger (a \$1 billion professional services corporation)*

"Your talk was the best talk I have heard on climate change because it offered so much hope. You got past the doom and gloom and gave real guidance on simple things we can do right now - as individuals and as a society. Ellen, we CAN do it. We just HAVE to do it!" — *William Young, Adjunct Professor, Temple U. and U. of Pennsylvania*
